

Heavy Vehicle Mechanic

We are looking for a motivated person to fulfill the position of Heavy Vehicle Mechanic for our location at Portland International Airport. Her/his main responsibilities are to ensure that the fleet of deicing trucks and service vehicles is well maintained and working properly.

Main Responsibilities:

- Perform repairs on deicing trucks and service vehicles;
- Regular maintenance of deicing trucks and service vehicles;
- Ensure that vehicles are clean and in good working order;
- Immediately report any anomalies or questions to his/her supervisor;
- Complete all necessary documents and reports as required.

Essential Skills:

- Must have at least three (3) to six (6) years experience in repairing heavy duty diesel trucks;
- Journeyman Heavy Equipment Technical, Automotive or Agricultural;
- Ability to diagnose and troubleshoot electrical, electronics and hydraulic systems ;
- Experience with Freightliner, Mercedes and/or Volvo type of equipment would be an asset;
- Experience with the Microsoft software suite (Excel, Word, Outlook) is essential;
- Must have a valid driver's license;
- Must obtain and maintain a Restricted Access Identity Card (RAIC) and an Airside Vehicle Operator's License (AVOP).

We are looking for an individual who is an excellent team player and is agile. The ideal candidate is able to work with minimal supervision, follows procedures and executes instructions, while keeping health and safety as priorities.
