

## Heavy Vehicle Mechanic

We are looking for a motivated person to fulfill the position of Heavy Vehicle Mechanic for our location at Portland International Airport. The main responsibilities are to ensure that the fleet of de-icing trucks and service vehicles is properly maintained and in good working order.

### **Main Responsibilities:**

- Perform repairs on de-icing trucks and service vehicles;
- Regular maintenance of de-icing trucks and service vehicles;
- Perform a prescribed preventative maintenance program on the fleet and service vehicles and automobiles;
- Initiate repair cost estimates;
- Perform general overhaul, installation, repair, replacement and adjustment of bearings, ignitions, carburetors, transmissions, differentials, axles, steering mechanisms, drive shafts, fenders, radiators and front end and rear suspension systems;
- Ensure that vehicles are clean and in good working order;
- Immediately report any anomalies or questions to his/her supervisor;
- Complete all necessary documents and reports as required;
- Inspect, diagnose, overhaul, adjust and repair gas and diesel powered trucks, automobiles and other power equipment
- Perform work in adherence to safe work practices and procedures and in compliance with applicable standards and specifications, including to perform work in accordance with and maintain equipment as required;
- Maintain a variety of records, including vehicle identification, date, mileage and nature of each inspection, maintenance, lubrication and repair performed;
- Maintain and document all purchase orders;
- Perform related duties and responsibilities as required.

### **EMPLOYMENT STANDARDS:**

- Ability to meet physical requirements necessary to safely and effectively perform required duties;
- Operate tools necessary for mechanic work;
- Possession of a valid and appropriate State Driver's License;
- Possession of a safe driving record that is in compliance with the restrictions set forth by the State;
- Be self-directed and work independently.

### **Essential Skills:**

- Must have at least three (3) to six (6) years experience in repairing heavy duty diesel trucks;
- Journeyman Heavy Equipment Technical, Automotive or Agricultural;
- Ability to diagnose and troubleshoot electrical, electronics and hydraulic systems;

- Experience with Freightliner, Mercedes and/or Volvo type of equipment would be an asset;
- Read and write at a sufficient level to successfully perform the required duties;
- Experience with the Microsoft software suite (Excel, Word, Outlook) is essential;
- Knowledge and experience in electricity, electronics and hydraulics would be an important asset
- Must have and maintain valid driver's license;
- Must pass a drug screening test and Airport security background check.

We are looking for an individual who is an excellent team player and is agile. The ideal candidate is able to work with minimal supervision, follows procedures and executes instructions, while keeping health and safety in high esteem.

Our job is SAFETY - and every part of your training will focus on this. If this sounds like your kind of fun, then email your resume to: **[jobs@aeromag2000.com](mailto:jobs@aeromag2000.com)**.
